H/S 23 Log Guard Fitting to H/S 33

If due to low stock availability we are unable to supply the log guard part number 42311 which fits the Harmony 33, Stanford 33 and SP33 models.

Replacing this with the slightly smaller in length log guard part number 44108 is perfectly acceptable.

This fits across the front of the fire box giving the same protection as the longer log guard, there is a small amount of front to back movement when fitted in place but this soon stops once wood ash has built up around it.

Both log guards are the same height giving the same protection to the front of the stove.

See the pictures on page 2 showing both log guards fitted to a Stanford 33 the same applies to the Harmony 33 and the SP33 stoves. It will also fit the insert stoves with the 33 size combustion chamber.
